Frontend developer looking for a first full-time role in a product team. I design interfaces and code them myself – from mockup to deployment – in React, Next.js and TypeScript. What I enjoy most is where design meets engineering: motion, real-time graphics and live data. I care about performance, accessibility and SEO, and I want to keep growing in a team alongside more experienced people.

Projects · GOVO DIGITAL, own brand · 2025 – present

01

Obok

2026 · govodigital.com/en/projects/obok

An interactive desktop with a living world driven by the real weather. Live data from several APIs (weather, currency and crypto rates, news, music) with caching and fallback sources, apps in windows, Spotlight with quick commands, video and motion tuned for 60 fps.

Next.js · TypeScript · WebGL · REST · Zod · Vercel

02

GOVO DIGITAL portfolio

2026 · govodigital.com

A website as a desktop with a living WebGL2 character – eyes following the cursor, blinking, breathing, chain physics – content windows, PL/EN, SEO and a contact form.

Next.js · WebGL2 · GLSL · Motion · Playwright
